DETAILED ACTION

Allowable Subject Matter

1. Claims 21-28 allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 21, the cited prior art of record, taken alone or in combination, fails to disclose or suggest a method of determining the state of a gas injection system in a plasma processing system comprises a step of measuring a response time corresponding to a change of said gas injection pressure using said pressure sensor, wherein said response time corresponds to a first time delay when said consumable gas inject plate exhibits a non-eroded state and said response time corresponds to a second time delay when said consumable gas inject plate exhibits an eroded state, in combination with the rest of the steps/limitations of claim 21. The cited reference of Gray (US 5,350,480) discloses a gas injection system comprises a consumable gas inject plate 92 and a pressure sensor 58, the pressure sensor measure only the pressure in the reservoir 14 (col 9, lines 1-6 , col 11, lines 15-20). The cited reference of Sawayama (US 2002/0014308) discloses a gas injection system comprises a consumable gas inject plate 4 and a pressure gauge 12, the pressure gauge measure only the fluctuation in pressure (page 3, paragraph 0039)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
